

Industrial Flood Protection

Sowerby Bridge, Calderdale

Products: Lakeside Demountable Flood Barriers; Ancillary Sewage Defence Measures

Completion Date: December 2016

The industrial units on Sowerby Bridge suffered devastating damage with significant commercial impact during the 2015 Calderdale floods.

Lakeside were selected to install flood defences directly by affected business owners, who were most notably attracted by the Lakeside Demountable Flood Barrier System and its market-leading features, as well as Lakeside's unique offering of being the only aluminium barrier manufacturer to also manage installation in-house.
